

TEACHER ONBOARDING

Welcome to Guidelight.

Hello — and welcome aboard.

This guide takes you from sign-up to your first insights, one step at a time, with real screenshots of exactly what you'll see.

The screenshot shows the 'Students' page in the Guidelight Teacher interface. On the left is a sidebar with navigation links: Students (selected), Lessons, Homework, Assessments, Insights, Info, and Settings. Below the sidebar is a balance section showing '\$0.01 / \$20.00' and a 'Switch plan' button. The main area displays a table of 10 students. Each row includes columns for Name, Username, Class, Subject, and a series of performance metrics: Avg. raw score, English level, Reading speed, Current weakspots, Wk. completion, Interests, and Career ambitions. All 'Wk. completion' values are 0%.

NAME	USERNAME	CLASS	SUBJECTS	Avg. raw score	English level	READING SPEED	CURRENT WEAKSPOTS	WK. COMPLETION	INTERESTS	CAREER AMBITIONS
Ava C.	ava_c	Year 10 English	English	—	B1	168 wpm	academic vocabulary	0%	football, K-drama, baking	sports journalist
Mia L.	mia_l	Year 10 English	English	—	B2	201 wpm	academic vocabulary	0%	biology documentaries	doctor
Zoe S.	zoe_s	IELTS Prep	English	—	B1	172 wpm	IELTS Listening section 3, academic vocabulary	0%	architecture, sketching	architecture school
Kat T.	kat_t	Year 10 English	English	—	B1	176 wpm	conditionals, listening detail	0%	anime, game design	game narrative designer
Leo K.	leo_k	Year 10 English	English	—	A2	132 wpm	tense consistency, spelling	0%	basketball, hip-hop, memes	undecided
Mia R.	mia_r	Year 10 English	English	—	B1	165 wpm	paragraph cohesion, phrasal verbs	0%	plants, travel blogs, photography	travel writer
Noah P.	noah_p	Year 10 English	English	—	B2	214 wpm	passive voice, formal register	0%	chess, coding, sci-fi	software engineer
Rui H.	rui_h	IELTS Prep	English	—	B2	196 wpm	IELTS Task 2 structure, paraphrasing	0%	economics podcasts	study abroad — UK
Sam W.	sam_w	Year 10 English	English	—	A2	141 wpm	word order, prepositions	0%	football, cooking shows	chef
Zoe M.	zoe_m	Year 10 English	English	—	C1	268 wpm	hedging language	0%	debate club, climate activism	lawyer

Your teacher dashboard: every student, level and weakspot at a glance

THE BIG PICTURE

One loop, one student profile

1

SET UP

Create your class — every student gets their own login

2

DIAGNOSE

A short AI-built test reveals each student's starting point

3

PLAN

Generate a semester plan with scaffolded, editable lessons

4

TEACH

Assign personalised homework; AI marks, you approve

5

ANALYSE

Insights, readiness scores and reports — exportable anytime

The golden rule: AI drafts, you decide. Nothing reaches your students until you have reviewed and approved it.

STEP 1 • SET UP

Create your class and invite students

- ▶ On the Students page, press Add class. Give it a name, subject and age range — e.g. “Year 10 Biology A”, Biology, 14–15.
- ▶ Paste your curriculum or syllabus notes as plain text (convert PDFs to text first).
- ▶ Add student names — one per line or comma-separated, e.g. Ava Chen, Noah Patel, Mia Rossi.
- ▶ Guidelight creates a login for each student. Copy the usernames and passwords straight away — they are shown only once.
- ▶ Takes about five minutes, once per class. Everything else starts here.

The screenshot shows a modal dialog titled "Add class" with a close button (X) in the top right corner. Below the title is a subtitle: "Create a class and student logins. Paste names as text — convert PDFs to markdown or plain text first." The form contains several input fields: "Class name" with the value "Year 10 Biology A", "Subject" with the value "Biology", and "Age range" with the value "14–15". Below these is a large text area for "Curriculum / syllabus notes" with the placeholder text "Paste curriculum outcomes, topics, exam board notes...". At the bottom is another text area for "Student names" with the example text "Ava Chen", "Noah Patel", and "Mia Rossi" on separate lines. A dark blue button at the bottom right says "Create class & student logins".

The Add class dialog — fill it in exactly like this

STEP 2 · DIAGNOSTIC

Find out what they already know

- ▶ Open Assessments, press Create assessment, and choose Diagnostic (class subject).
- ▶ Describe what to cover, e.g. “Term 1 baseline: cell structure and enzymes”, then set the question count and a time limit.
- ▶ Review the AI draft question by question, edit anything, then publish to the class.
- ▶ Highly recommended in week one: results power the personalisation of every plan, task and insight that follows.

The screenshot shows a 'Create assessment' form with the following sections:

- Create assessment** (title bar with a close button)
- AI drafts the task; you review and edit before publishing to students.
- Assessment type** (dropdown menu):
 - Diagnostic (class subject) (selected, marked with a checkmark)
 - Diagnostic (class subject)
 - Formative (class subject)
 - English level (literacy — not class subject)
 - Reading speed (literacy — not class subject)
- ☒ Use registered class subject
- Task description** (text area):

What should students practise or be assessed on?
- Number of questions** (input field): 8
- Hard time limit (minutes)** (input field): 45
- Optional reading text** (text area):

Paste plain text / markdown for comprehension-style questions.
- Past paper inspiration** (text area):

Upload a PDF or image of a past paper, and/or paste extra notes. AI will mimic the style.
- Upload PDF or image** (button):

PNG, JPG, WebP, or PDF

Choose “Diagnostic (class subject)” when creating an assessment

STEP 3 · PLAN

Generate your semester plan

- ▶ Open Lessons and press Plan lessons. Choose the class, then enter your logistics: lesson length, days of the week, start date, weeks (1–12) and the resources you have.
- ▶ Guidelight drafts a full batch of scaffolded lessons (Presentation → Practice → Production).
- ▶ View as a calendar or a list; open any lesson to edit objectives, steps and notes.
- ▶ Export the whole batch as DOCX or CSV for senior leadership or to share with your team.

A generated plan in calendar view — every lesson is editable

Assign, auto-mark, approve

- ▶ Open Homework and press Create homework. Describe the task in plain words, e.g. “Photosynthesis recap — 8 mixed questions”, and pick a difficulty.
- ▶ AI drafts the questions. You are the editor-in-chief: change wording, delete a question, or add your own before anyone sees it.
- ▶ Publish to the whole class or selected students, with an optional time limit.
- ▶ AI marks each submission with a percentage score and written feedback per question.
- ▶ Review the feedback, adjust if needed, then release it. Students never see unreviewed AI feedback.
- ▶ Tip: a completed diagnostic makes every generated task land at the right level for each student.

Timed mocks that tell the truth

- ▶ Create a mock exam template once: title, curriculum, syllabus code, duration and grade boundaries — e.g. pass at 40%, target at 80%.
- ▶ Paste or upload a past paper and the AI mimics its style, format and mark scheme.
- ▶ Each mock generates a fresh paper in the real exam format, with a hard time limit.
- ▶ You approve results before students see them — same as homework.
- ▶ Every attempt sharpens each student's exam-readiness score: who is on track, who needs intervention.

The screenshot shows a 'Create exam profile' form with the following fields and options:

- Exam title:** A text input field containing 'e.g. IGCSE Biology Paper 2'.
- Curriculum:** A dropdown menu.
- Syllabus code:** A text input field containing 'e.g. 0610'.
- Duration (minutes):** A text input field containing '45'.
- Pass grade:** A dropdown menu showing '4 (≥40%)'.
- Target grade:** A dropdown menu showing '8 (≥80%)'.
- Grade boundaries (% minimum):** A table with 8 rows, each with a grade, a percentage, and a 'Pass' checkbox.

Grade boundaries (% minimum)		
9	90	☐ Pass
8	80	☐ Pass
7	70	☐ Pass
6	60	☐ Pass
5	50	☐ Pass
4	40	☒ Pass
3	30	☐ Pass

The exam profile — set boundaries once, reuse all year

Turn daily work into direction

- ▶ Open Insights to see class and per-student performance over time.
- ▶ Press Pinpoint weakspots for an AI-written summary of where the class is struggling — with evidence and a suggested next step for each one.
- ▶ Add events — exams, interventions, absences — to see their effect on the trend.
- ▶ Generate detailed reports for school leaders or parents in one click, and export the raw data as CSV anytime.

Class weakspots

Pinpoint weakspots

Year 10 English shows a stark divide: Zoe M. consistently scores 90%+, while Leo K., Mia R., and Sam W. struggle below 65%. A critical systemic issue is that the majority of submitted work contains blank answers with no feedback, making it impossible to distinguish between skill gaps and non-submission/technical problems. Where data exists, Ava C. demonstrates solid grammar and reading skills, but the class-wide pattern of incomplete assessments masks true learning needs. Lower-performing students (Leo K. 48-58%, Mia R. 60-69%) appear most affected by missing work, though diagnostic patterns suggest underlying weaknesses in foundational grammar and extended writing.

Assessment completion and engagement High - 1x

Submit complete responses across all task types

Evidence: Noah F., Mia R., Leo K., Zoe M., Kai T. all submitted blank answers for 3-4 questions on the mid-term; similar pattern on homework. Leo K. and Mia R. most affected with 0 marks on multiple sections.

Next step: Investigate technical barriers or time management issues, implement chunked assessments with mandatory completion checkpoints before submission.

Extended writing and short constructed responses High - 1x

Produce coherent multi-sentence responses with appropriate grammar and development

Evidence: Sam W., Mia L., Mia R., Leo K. all scored 0/3 on Term 1 diagnostic extended response; Ava C. received 2/3 with feedback to add relative clauses. Blank responses dominate across all homework and most assessments.

Next step: Use sentence frames and scaffolded paragraph templates, practice timed writing with check-in protocols to ensure attempt completion.

Reading comprehension — extracting explicit information High - 1x

Identify stated information and trade-offs in passages

Evidence: Ava C. succeeded (100%) on climate passage trade-off; all other students submitted blank answers. Sam W., Mia L., Mia R., Leo K., Kai T. scored 0/4 on Maya passage. Exam Dojo scores suggest persistent gap for Mia R. (64-69%) and Leo K. (51%).

Next step: Teach annotation strategies and question-type recognition; provide leveled practice with immediate feedback loops.

Pinpointed class weakspots: evidence and a next step for each

Built-in checks for a diverse classroom

CEFR English level test

A full A1–C2 diagnostic covering vocabulary, grammar, reading and listening — mapped to IELTS bands, so you know exactly who needs language support to access your curriculum.

Reading speed assessment

Measure each student's words-per-minute with comprehension spot-checks, so you can plan assigned reading realistically and intervene early with struggling readers.

Find them in Assessments

Both live alongside your subject assessments — no extra setup, and results join the same student profile.

Same rules apply

All drafts and marks; you review and approve before anything reaches students or parents.

GOOD TO KNOW

Private, affordable, always yours

Your data stays private

All AI runs on Cloudflare — class data is never sent to OpenAI or any external AI company. Data is minimised and encrypted, with GDPR export and deletion built in.

Pay only for what you use

No subscription: you pay at month end for the AI you actually used, with a spending cap you control. Invoices include school PO details for easy reimbursement.

You are always the approver

Every test, plan, task and report passes through you. AI works for you, not the other way around.

Your data is portable

Export class and student data as CSV at any time. No lock-in, ever.

YOUR FIRST WEEK

Five steps to lift-off

1

SET UP

Create your class and
copy the student logins

2

DIAGNOSE

Run the diagnostic test in
week one

3

PLAN

Generate and refine your
semester plan

4

ASSIGN

Set your first homework
and approve the feedback

5
